

PRAVEEN KUMAR

Full-Stack Developer | AI Automation Engineer | B.Tech IT Student

+91 6380953716 | pkpraveen83441234@gmail.com | Coimbatore, Tamil Nadu, India

Portfolio: praveenkumarportfolio.vercel.app | GitHub: github.com/Praveen-pk-pro | LinkedIn: linkedin.com/in/praveen-kumar-06ace

PROFESSIONAL SUMMARY

Information Technology undergraduate (Class of 2028) working as a freelance web and AI automation developer alongside coursework. Independently designed, built, and shipped five full-stack and AI automation projects, including a multi-tenant RAG SaaS platform and a scheduled WhatsApp lead-distribution system. Hands-on with retrieval-augmented generation (RAG), multi-provider LLM orchestration (Gemini, Groq, OpenRouter), GitHub Actions pipelines, and Supabase applications with row-level security. Seeking Full-Stack Developer / AI Automation Engineer internship and entry-level roles.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, TypeScript, JavaScript

AI & Automation: RAG Pipelines, Prompt Engineering, Multi-Provider LLM Integration (Gemini, Groq, OpenRouter), n8n, GitHub Actions

Web & Backend: Next.js, FastAPI, Supabase (Auth & Row-Level Security), Qdrant Cloud (Vector Search), Razorpay Payment Integration

Tools & Platforms: Git/GitHub, AWS Cloud (Fundamentals), MySQL, Docker

EXPERIENCE

Freelance Web Developer — Independent

2025 – Present

- Design, build, and ship full-stack web applications for clients — including portfolio sites and Supabase-backed tools — end-to-end, from architecture through deployment.

PROJECTS

RAG-as-a-Service — Multi-Tenant AI Knowledge Base SaaS

Next.js, FastAPI, Supabase, Qdrant Cloud, Groq/Gemini, Razorpay | [GitHub: Praveen-pk-pro/Rag-as-a-service](https://github.com/Praveen-pk-pro/Rag-as-a-service)

- Designed and built a multi-tenant retrieval-augmented-generation (RAG) platform on free-tier infrastructure, letting businesses upload documents and get an instant AI chatbot.
- Implemented Supabase Row-Level Security for strict per-tenant data isolation and integrated Qdrant Cloud for vector search.
- Integrated Razorpay for Indian-market billing and built multi-provider LLM fallback (Groq/Gemini) for low-latency, reliable inference.

WhatsApp Lead Distribution Automation

Supabase, GitHub Actions, WhatsApp Business Cloud API, n8n | [GitHub: Praveen-pk-pro/whatsapp-lead-automation](https://github.com/Praveen-pk-pro/whatsapp-lead-automation)

- Built a scheduled automation system that distributes inbound sales leads to a team over WhatsApp, with a companion CSV-upload web tool.
- Used GitHub Actions cron scheduling for reliable, serverless execution at zero hosting cost, plus parallel n8n workflows for lead distribution and attendance alerts.

AI YouTube Automation System (Faceless YouTube Channel)

Python, Gemini, OpenRouter, MoviePy, gTTS, IndicF5, YouTube Data API v3 | [GitHub: Praveen-pk-pro/jesusautomation](https://github.com/Praveen-pk-pro/jesusautomation)

- Engineered an end-to-end faceless-video pipeline — scripting, text-to-speech, and assembly — publishing to the YouTube Data API v3 (OAuth2) via GitHub Actions on a fixed schedule with zero manual editing.
- Built English and Tamil TTS pipelines (gTTS, IndicF5), resolved Tamil font-rendering issues, and implemented multi-provider AI fallback across script-generation APIs to maximize uptime.

Free AI Chatbot — SSEC AI Bot (Team Project of 4)

TypeScript, Vite, OpenRouter | [Live: ssec-ai-bot.vercel.app](https://live.ssec-ai-bot.vercel.app) | [GitHub: Praveen-pk-pro/Free-AI-Chatbot](https://github.com/Praveen-pk-pro/Free-AI-Chatbot)

- Deployed a live AI chatbot answering from a custom knowledge-base file, with parallel fallback routing across 5 OpenRouter models (Gemma, Qwen, GLM, LFM, NemoTron) for reliable uptime.
- Collaborated in a 4-person team with fellow second-year IT students under faculty guidance.

Smart Crop Advisory System — 3rd Prize, DesignXpo 1.0

HTML, CSS, JavaScript | [Live: design-event.vercel.app](https://live.design-event.vercel.app) | [GitHub: Praveen-pk-pro/Design-event](https://github.com/Praveen-pk-pro/Design-event)

- Built a farmer-facing web app for crop recommendations and weather-based insights under a no-agentic-AI constraint.
- Placed 3rd out of the intra-collegiate field at Sree Sakthi Engineering College's DesignXpo 1.0.

EDUCATION

B.Tech in Information Technology 2024 – 2028

Sree Sakthi Engineering College, Coimbatore, Tamil Nadu

CERTIFICATIONS

- Industrial Training in Python for ML — Botroid Tech, June 2026
- RAG Course for Beginners — Certificate, January 2026
- AI Agents for Beginners — Certificate, January 2026
- Value-Added Course: MEAN Stack — VEI Technologies, in collaboration with Sree Sakthi Engineering College
- Value-Added Course: AWS Cloud — VEI Technologies, in collaboration with Sree Sakthi Engineering College

ACHIEVEMENTS & ACTIVITIES

- 3rd Prize, DesignXpo 1.0 — intra-collegiate technical event, Dept. of CSE, Sree Sakthi Engineering College
- Participant, CIH'26 — Coimbatore Innovation Hackathon (24-hr national challenge, AIC RAISE x Rathinam Global Deemed University)
- Participant, AURA'26 National Level Technical Symposium — Bug Smash, Tech Quiz, Paper Presentation (Adithya Institute of Technology)
- Participant, INTRA-SSEC Intrusion-X CTF — cybersecurity capture-the-flag event
